## Riesling Rediscovered

Bold, Bright, and Dry

JOHN WINTHROP HAEGER

Riesling is the world's seventh-most-planted white wine grape variety, and among the fastest growing over the last twenty years. It is a personal favorite of many sommeliers, chefs, and other food and wine professionals for its appealing aromatics, finesse, and minerality, for its uncanny ability to reflect terroir, and for its impressive versatility with cuisines of all types. It is stylistically paradoxical, however. Now usually made dry in most of Europe and Australia, and assumed dry by most German consumers, Riesling is made mostly sweet or lightly sweet in North America, and is believed sweet in the American marketplace irrespective of its origin. Riesling is consequently—but mistakenly—shunned by the mainstream of American wine drinkers, whose tastes and habits have been overwhelmingly dry for two generations.

*Riesling Rediscovered* looks at the present state of dry Riesling across the Northern Hemisphere: where it is grown and made, what models and objectives vintners have in mind, and what parameters of grape growing and winemaking are essential when the goal is delicious dry wine. John Winthrop Haeger explores the history of Riesling to illuminate how this variety emerged from a crowded field of grape varieties widely grown across northern Europe. *Riesling Rediscovered* is a comprehensive, current, and accessible overview of what many consider to be the world's finest and most versatile white wine.

**John Winthrop Haeger** is a sinologist, historian, and academic administrator who has written about wine since 1985 for *Connoisseur*, *Wine & Spirits*, *Saveur*, and other publications. He is the author of *North American Pinot Noir* (2004) and *Pacific Pinot Noir* (2008), both published by UC Press.
